### Remarks/Arguments

In the Advisory Action of December 2007, the Examiner has explained the relevance of the cited US Patent 6,400,702 to Meier. The Applicants have amended Claim 1 to more clearly recite that the network comprises only one access point device, and that the access point device is adapted to manage the centralized wireless network. The Applicants submit that the Examiner appears to recognize that the cited patent to Meier includes several access point devices, and therefore does not affect the patentability of the invention as defined by Claim 1 as amended.

The Applicants submit that this application is now in condition for allowance. A notice to that effect is respectfully solicited.

Respectfully submitted,

Sebastien Perrot et al.
